

## CAREER OBJECTIVE

---

Passionate and dedicated developer skilled in Python, Java and C++ with experience in building practical applications such as chatbots, quiz application, and management systems. Eager to contribute to high impact software solutions. Also seeking to apply my skills in developing intelligent solutions and contributing to innovative AI applications.

## EDUCATION

---

- **G H Raison University Amravati**  
*Bachelor of Technology in Computer Science and Engineering; GPA:7.93*  
Nagpur, Maharashtra, IN  
Sept 2023 – June. 2026
- **Government Polytechnic, Gondia**  
*Diploma in Computer Engineering; Percentage: 75.00*  
Gondia, Maharashtra, IN  
Sept 2020 – June 2023

## EXPERIENCE

---

- **ANORG Technologies**  
*IOT (Internship)*  
Gondia, Maharashtra, IN  
July 2022 – Aug 2022
  - Learned how IOT work by using sensors and small computers (like Aurdino or ESP 32) to collect and send data.
  - Connected devices to the internet, so they could send data to a mobile app or computer in real-time.
  - Worked with simple programming languages like C++ or Python to control devices and make them respond to changes (e.g., turn on a light when it's dark).
  - Used cloud platforms (like Firebase or AWS) to store and display data from sensors in a clear and organized way.
  - Teamed up with others to build and test small IoT projects, learning how to solve problems and improve the system step by step.

## PROJECTS

---

- **AI Chatbot with Voice and GUI (Python):**
  - Built a voice-controlled AI assistant with wake word detection, speech recognition, and text-to-speech.
  - Integrated OpenAI API for natural conversation and developed a GUI with Tkinter featuring animations and live waveform.
  - Enabled single-sentence command execution with utilities like web search, jokes, and app launching.
  - Tech Stack: Python, SpeechRecognition, Pytsx3, Porcupine, OpenAI API, Tkinter, Selenium.
- **Bank Management System (C++):**
  - Designed and implemented a Bank Management System in C++ that automated account management and transaction processing
  - Used OOP, file handling, and exception handling to ensure reliability and data security.
  - Reduced manual workload by creating a system for efficient record keeping and quick balance updated.
  - Tech Stack: C++, OOP, File Handling, Exception Handling, STL, Console-based UI.
- **Online Quiz Application (Java):**
  - Created an interactive Java Quiz Application to test users' knowledge with real-time scoring and timer functionality.
  - Applied Object-Oriented Programming (OOP) and GUI design to enhance usability.
  - Ensured flexibility to add/edit questions and track user performance.
  - Tech Stack: Java, OOP, JavaFX/Swing, File Handling (for storing questions), GUI.

## PROGRAMMING SKILLS

---

- **Languages:** Python, Java, C++
- **Web Technologies:** HTML, CSS, Javascript
- **AI/ML:** Basics of AI, Machine Learning
- **Libraries and Tools:** Pyttsx3, SpeechRecognition, OpenAI, Tkinter
- **Database Management:** SQL, Oracle
- **Concepts and Fundamentals:** DBMS, Computer Networks, OOPS Concepts
- **Mobile Development:** Android Development with Java and XML
